

Murrayfield Court, Edinburgh

Moy Materials were asked by the Project Surveyor to survey the roof of this residential development in Edinburgh with a view to advising on refurbishment solutions required to provide long-term waterproofing protection over the client's asset. The old roof coverings had reached the end of their serviceable life and the rooflights no longer complied with Building Standards, offering poor light transfer into the space beneath.

Our Paralon modified-bitumen waterproofing System was installed over the existing roof, minimising disruption to the occupied space below. New triple-skin polycarbonate rooflights were incorporated into the design to meet current building standards. Our Enkopur cold-applied liquid waterproofing and Imper self-adhesive systems were installed around vulnerable zones, negating the requirement to use hot works where not appropriate.

All backed by a 20 year single-point guarantee.

Products Used Paralon modified-bitumen waterproofing; Enkopur cold-applied liquid; Moy Polycarbonate Rooflights

Completed
2018
