

PROJECT REFERENCE

Parkway Shopping Centre

Parkway SC, Coulby Newham

Moy Materials were invited to site in order to provide a Roof Condition Survey and Refurbishment Specification to alleviate water ingress issues to an aged built-up bitumen felt covered roof.

A robust waterproofing system, capable of managing the limited foot traffic associated with maintenance, was required and so the client opted for our Imper Paralon modified bitumen System.

This system carried a 20 year single point warranty for all areas waterproofed. The final specification called for a failed hessian-fleece-reinforced system to be removed and the underlying bitumen felt waterproofing to be repaired where required, with only saturated sections of the existing build-up requiring to be stripped and replaced, prior to the installation of our 2 layer Imper Paralon waterproofing system. Gutters were encapsulated with our cold-applied liquid system, Enkopur.

The attention to detail on this project was exemplary and put an end to the client's long-standing problems with water ingress.

Products used Paralon Total Warm Roof System, BBA Certified

Roof area 7,000 m2

Completed January 2016

Installing contractor Group Tegula Ltd

Building Surveyor Thomas & Adamson
